

## VISTA Control Consoles for Mission Critical Environments

VISTA Consoles offer innovative design that combines form and function | Optimal operator support is fundamental for situational awareness | Furniture housed technology is mandatory for critical functions | VISTA brings human-machine interface together impacting risk mitigation.

# VISTA CONTROL CONSOLES

All Features Allow for Easy Access, Changes and Modifications

- Premium Feature Rich Control Console
- Built to Endure 24/7/365 Use
- Flexible – Layered Modularity
- Sit/Stand Height Adjustment or Fixed Height
- 3 Integrated Horizontal Cable Management Zones

- Uniquely Curved Slatwall
- Lighted Lower Technology Storage
- Accessories Available for User Comfort and Personalization (Lighting, Environmental Controls, Storage)
- Supports Various Monitor Configurations
- Ergonomically Engineered

# VISTA BEST IN CLASS FEATURES

## Form and Function

Curved Slatwall elegantly surrounds the user, naturally providing perpendicular monitor viewing and consistent focal distances | Functions as monitor and accessory support | Manages and conceals upper cables | Elevated “Monuments” function to support the slatwall and accommodate accessories, such as device charging power, task lighting, switching, etc., and guide cables to the lower technology cabinets. All easily accessible for quick changes and technology modifications.

Contemporary aisle lighting and lit end panels add to the overall aesthetic.

## Exceptional Power / Data and Technology Integration

Unique interior cabinet slatwall allows for technology mounting with auto-illumination when doors open. Horizontal and vertical cables flow to where you need them while staying cleanly out-of-sight but easily reached.

Thoughtful engineering makes this a console for every control room.
